## MODEL DESCRIPTIONS

### 112 TURQUOISE

The 112 model features a one foot, ½" O.D. vinyl tube with a plastic stopper to seal the flexible funnel from contaminants, and a small, capped opening at the top. This funnel is best used for hard-to-reach openings and tight spaces.

### 115 ORANGE

The 115 model is the smallest funnel carried at just under 9" tall, with a small, capped end (0.6") and a small, capped opening. This funnel is best used for smaller-scale applications with its slender end and a compact size. Perfect for motorcycle maintenance!

### 315 LIGHT BLUE

The 315 model features a small, capped end (0.6"), a large, capped top and is 14" in length. This general-purpose funnel can be used for many applications utilizing its narrow end and average size.

### 318 LIGHT BLUE

The 318 model features a unique slip cap to seal its small ½" end, has a large, capped top and is just under 11" in length. This funnel is best taken advantage of for frequent use due to the ease of use of the slip cap.

### 320 DARK BLUE

The 320 model features a medium-sized, capped end (0.8"), a large, capped top, and is just under 11" in length. This funnel is perfect for general-purpose use.

## 328 TURQUOISE

The 328 model features a large, capped end (1"), a large, capped top, and is 10" in height. This general-purpose funnel is best used for substantial flow with its wider end.

## 338 BLACK

The 338 model features an extra-large, capped end (1.4"), a large, capped top, and is just under 11" in height. Another general-purpose funnel, but best used for massive flow for larger tanks/containers.

## 415 BRIGHT RED

The 415 model features a small, capped end (0.6"), a large, capped top, and is 17.5" in height. This funnel also features a flexible neck for uses in awkward spaces.

## 420 YELLOW

The 420 model features a medium, capped end (0.8"), a large, capped top, and is 14.5" in height. This funnel also features a flexible neck to provide convenience in tighter spaces.

## 428 GREEN

The 428 model is offered in two choices of colors: green and black. This funnel features a large, capped end (1"), a large, capped top, and is 13.4" in length. This funnel features a flexible neck for ease-of-use in more challenging applications, with a large end for better flow and faster fill-ups.

## 428BK BLACK

The 428 model is offered in two choices of colors: green and black. This funnel features a large, capped end (1"), a large, capped top, and is 13.4" in length. This funnel features a flexible neck for ease-of-use in more challenging applications, with a large end for better flow and faster fill-ups.

## 438 DARK RED

The 438 model features an extra-large, capped end (1.4"), a large, capped top, and is 14.3" in height. This funnel also features a flexible neck for uses in hard-to-reach places and is best used for massive flow for larger tanks/containers.
